

Certified Washable Cut Resistant Range

Product Guide

Glove Laundering Guide for Tilsatec PPE

Reduce your impact on the environment while still making cost effective purchasing decisions and maintaining the level of protection for your workforce?

Through working with customers on a program of product development we can now offer a range of gloves and sleeves which are certified washable without any effect on mechanical performance or comfort allowing you to increase the longevity of your PPE.

As a key supplier into industries such as automotive, metal fabrication and glass, we understand the need for industrial laundering in many applications, which is why we have certified several high cut products to both the ISO15797 Industrial Wash Standard as well as ISO 6330 Domestic Wash Standard.

REDUCED WASTE

CERTIFIED
PERFORMANCE
AFTER WASHING

INDUSTRIAL &
DOMESTIC WASHING

ISO 15797 is the International Standard that specifies test procedures in the evaluation of workwear and PPE intended to be industrially laundered.

ISO 6330 is the International Standard that specifies domestic washing and drying procedures for textiles and PPE.

All tests required in these standards as well as in the specific standards for protective gloves shall be performed on unused gloves unless otherwise stated. Care instructions are provided on product labels and in user information sheets for all certified washable PPE. The relevant performance standards have been tested on the gloves or sleeves, before and after they have been subjected to the recommended number of cleaning cycles using the claimed cleaning instructions.

Code	Glove	Standards	Washing	Drying	No of Washes	Wash Standards
53-7111 Medium weight cut level F PU palm coated glove with thumb reinforcement		EN388: 2016 4 X 4 3 F	40°C 	40°C 	x3 	Industrial/Domestic
